Finance) and DBM (Retail  
Management)

## ABOUT ME

I am a highly motivated junior software engineer with over ten years of experience in sales and marketing. I am seeking a career change to software engineering because I believe in the power of technology in creating a unique and limitless future for humanity. Additionally, my experience and expertise in sales and marketing has taught me the essential skills of being a team player, a problem solver and an excellent communicator who strives to continuously learn and grow.

## PROJECTS

### Task Manager | Individual Project | [View Client Side Code](#) | [View Server Side Code](#)

Task Manager is an app designed for individuals to organize their personal and professional tasks based on priorities. This app has full CRUD functionality. The client side was built using CSS, JavaScript, React, and React Bootstrap. The server side was built using Python, SQL, Django.

### My Yoga App | Individual Project | [View Code](#)

My Yoga App is an app designed for busy professionals who do not have time to drive to a yoga studio or to follow an hour-long yoga video. This app will help them design their own time-base yoga sequences.

This is a single page application built using CSS, JavaScript, React, React Bootstrap, and JSON with full CRUD functionality.

### Nutshell | Group Project | [View Code](#)

Nutshell is a social dashboard app with a task list, group chat, news, and events. This app was built by a four- person team in a simulated agile environment. This app was built using JavaScript, CSS, HTML, JSON.

## TECHNICAL EXPERIENCE

### Software Developer

*Nashville Software School, Nashville, TN / March 2020 – Present*

*Intensive hands on 6-month Full Stack Software development course. Created a variety of applications both as part of a team as well as individually.*
