ABOUT ME

Throughout my entire life, I have had an AVID interest in technology. As a child, I would take apart electrical components and try to understand how they work. Coding was a branch of technology that I became curious about after seeing it referenced in many movies in the 90's. 2020, has given me all the right components of time, resources, and motivation to take the leap into this new career path. I view software development as an opportunity to create, problem solve, and help others, all of which are passions of mine.

PROJECTS

Rec Hub- Back End Capstone Project
https://github.com/dmccracken13/rec-hub-client
Outdoor recreational gear and activity tracking app that allows users *to create lists of gear, gear containers, trips, and friends, and associated data such as gear types, statuses, and activities*
-Created single page application using HTML, CSS, and JavaScript, React, and React Bootstrap
-Created REST API using Python and Django to handle all client CRUD requests

Neurofeed- Front End Capstone Project
https://github.com/dmccracken13/neurofeed
Documentary tracking app allowing users to create lists of documentaries and attach user generated data such as rating, review, and associated categories
-Created single page application using HTML, CSS, JavaScript, React, and React Bootstrap
-Store user data in local JSON server
-Used external API to retrieve documentary data
-Enabled full CRUD capability for tracking retrieved data and associated user data

EDUCATION

Nashville Software School Sep 2020 - Mar2021
Full Stack Web Development Bootcamp
Nashville State Community College
Psychology Course Work
The Nashville Film Institute
Cinema Production Program
Austin Peay State University
Media Communications Course Work

TECHNICAL EXPERIENCE

Nashville Software School
Junior Developer: *Sep 2020 - Mar 2021*

Intensive 6 month lab focused full-stack software development program creating applications in team based environments and individually using modern industry technologies

-Built single page applications using HTML, CSS, JavaScript , React, React Bootstrap
-Built REST API's using Python, Django, and SQL
-Simulated agile work environment
-Git and Github for version control
-Fully remote collaboration experience
-Comprehensive understanding of data relationships

PROFESSIONAL EXPERIENCE
